WHY ULTRAVIOLET CYBER?

To continuously increase the cyber readiness and resilience of our clients.

Best-in-class security experts

Our industry experts have decades of experience implementing and operating SOCs for DHS and other security focused U.S. Government Agencies. Coupled with our NSA offensive pedigree, UltraViolet Cyber knows the adversary because we used to be the adversary.

Not your Dad's MSSP

Born in the cloud and led by automation, UltraViolet Cyber meets your business where it is today—and where it wants to go tomorrow. Flexible delivery models, whether co-managed, hybrid, or platform enabled make sure our clients get exactly what they need when they need it.

Partner not provider

We partner with our clients to deliver secure outcomes. We don't hide behind SLAs or service descriptions. We work with you to understand your environment and maximize your cyber spend to truly improve your cyber resilience.

ABOUT ULTRAVIOLET

UltraViolet is an industry leading tech-enabled managed security services company. Founded and operated by security practitioners from the national intelligence community, and currently providing services to the Global 2000 and Federal Government. UltraViolet transforms your security program through connecting offensive security, detection and response, and security engineering. Instead of complex operational silos, you get integrated, unified security response. Meeting you where you are in your cyber program journey, we manage existing enterprise platforms you have invested in or provide all necessary tooling through our security-as-a-service solution, UV Lens. UltraViolet is headquartered in McLean, Virginia with global technology centers across the world.
